

# HiVolt Alert™

## Warns you when the power lines get too close for comfort.

IN MANY HEAVY INDUSTRIES THERE'S NOTHING MORE POTENTIALLY DANGEROUS THAN HIGH VOLTAGE POWER LINES.

In fact, equipment coming into contact with high voltage power lines is the direct cause of nearly 100% of all fatal electrocutions on the job. And it's not only a deadly hazard for equipment operators but also for any ground crew or pedestrians.

# Introducing Wireless HiVolt Alert™ Proximity Warning System

New from Atlas Polar, HiVolt Alert™ high voltage sensors are designed for use on all types of equipment with boom arms, masts or virtually any other type of extension. They are designed to let you know when your safety limit has been reached. Because in the majority of cases, equipment operators can be either distracted or not be able to visually verify their distance from high voltage wires.

HiVolt Alert™ high voltage sensors are like an extra pair of eyes on your equipment that warns you before you are dangerously close to high voltage power lines.

## HIVOLT ALERT™ IS A COMPLETELY WIRELESS PROXIMITY WARNING SYSTEM THAT HAS A COUPLE OF VERY USEFUL ADVANTAGES.

1. HiVolt Alert™ is the most flexible wireless system of its kind. Sensors can be placed anywhere on the equipment.
2. Unlike other systems, HiVolt Alert™ does not have to be programmed for each individual job site. Once its installed, it's good to go no matter where the job takes you.

## WE'VE ALWAYS BELIEVED IN THE BETTER MOUSETRAP.

The HiVolt Alert™ is an early warning system. Operators must still be aware of and cautious around high voltage power lines. HiVolt Alert™ gives you an easy-to-use tool for a more safe and secure job site.

LED & Horn Systems Status

## HIVOLT ALERT™ IS NOT JUST FOR CONSTRUCTION.

The range of usage for the wireless HiVolt Alert™ system is not limited to the construction industry. It can be used effectively to lower the risk of high voltage power line contact in any number of areas including:

- Ladder trucks in fire departments
- TV location vans with expandable antennas
- Dump trucks and other road maintenance equipment
- Logging Trucks
- Tree trimming Trucks

## IF THE ATLAS POLAR NAME IS ON IT, YOU CAN TRUST THE QUALITY.

Atlas Polar is all about quality. And our new wireless HiVolt Alert™ System is designed to the same high quality standards as every other piece of equipment with our name on it.

The wireless HiVolt Alert™ System from Atlas Polar. Designed to make equipment and the people who use it, safer.
