

Atlas Polar IT'S ALL ABOUT QUALITY™

ATLAS POLAR CAREERS

MECHANICAL ENGINEER – HYDROELECTRIC INDUSTRY

Benefits—Why join our Atlas Polar family?

As a member of our HYDRORAKE™ Division, you'll work independently and with our experienced professionals in an inclusive team environment that rewards innovation, supports its staff and prides itself on safety. A family business for 88 years, Atlas Polar is Canada's #1 truck-mounted sales and service network. We distribute the world's #1 truck-mounted and manufacture North America's leading waterways debris cleaning equipment brands.

- Job security
- Competitive salary
- Comprehensive benefits package for full-time employees
 - Prescription, dental and paramedical coverage
 - Sick days benefits
 - Paid vacation available in year one
 - Company pension plan
- Respect and appreciation of our employees
- Opportunities for training and development
- Employee appreciation activities

Your role—Duties + Responsibilities

- Design proprietary mechanical system installations for HYDRORAKE™ and HYDROBRUSH™ water cleaning and STOPLOG LIFTER™ water control systems to customer specifications
- Prepare detailed mechanical drawings to established drafting standards
- Specify system components or direct product modification to conform to performance requirements
- Liaise with the Project Coordinator and production staff to solve technical issues related to equipment design, fabrication and installation
- Collaborate with the project team from concept through completion to the highest standards
- Liaise with sales staff to clarify and meet project specifications
- Contribute to the team effort to ensure cost, budget and schedule controls

Qualifications—What makes you the right fit?

You are an innovative self-starter—a proven creative problem-solver, able to handle competing priorities with strong time management skills and a methodical work process. You have excellent written and verbal communication skills, an eye for detail and can work independently as well as easily in a team environment.

- Certificate or associate's degree in mechanical design
- Minimum two years' experience working in a manufacturing environment
- Recognized design experience in hydraulic, electrical and mechanical systems
- Solid understanding of mechanical design and manufacturing processes
- Proven AutoCAD and Inventor software experience
- Familiarity with relevant Ontario standards, including the Occupational Health and Safety Act (OHSA) and ASTM

Work hours and Benefits: Apart from working with a great team, your job at **Atlas Polar Company Ltd.** provides full benefits and a matched-pension plan. This posting is a **full-time** position.
