

MOFFETT M8 NX2

Deliveries have never been so easy.

A rear view of a red Moffett M8 NX2 forklift. The image shows the back of the machine, including the operator's seat, the rear panel with a ventilation grille, and the rear wheel. A semi-transparent grey box with white text is overlaid on the rear panel. The Moffett logo is visible on the rear panel, and the 'MOFFETT' brand name is printed on a lower section. A blue and white logo is also visible on a silver plate near the bottom right.

Climbing on and off your forklift to mount and dismount at least 2500 times a year—imagine never having to do that again.

 **MOFFETT**

GroundMount Plus system

It's all about the operator.

GroundMount Plus lets you mount and dismount with the push of a button, from ground level, out of traffic and safely at curbside. It's safe, efficient and convenient. And your body will thank you.

Two focused Strobe Beacons

Better on both sides

Not one, but two high-powered strobe beacons fitted to the sides of the overhead guards significantly increase safety and 360-degree visibility. They are highly focused on better coverage and away from the operator's eyes.

Easy 180-Degree Steering

Rear-end control.

A new rear steering-angle spindle conveniently lets you steer 90 degrees in either direction for better, more efficient handling, manoeuvrability and control.

Robust new work lights system

Safer for you and your Suzie.

Light up the streets 360 degrees, improving safety and visibility. Lights are better protected behind beefed-up light guards, and fixed and bracketed, the Suzie cable stays safely where belongs.

Advanced 3.5" Colour Display

All the info snow or shine.

Harsh winters? No problem. The M8 NX2 display has an optically-bonded panel with automatic on/off heated display and full IP67 protection. Fuel level, engine and coolant information and service data are always accessible.

Redesigned Radiator Side Panel

Very cool.

The M8 NX2 side panel improves protection for your rad and keeps your engine cooler for longer life and less maintenance.

Class III fork carriage

Stronger and a better view.

The new Moffett M8 NX2 Class III fork carriage is stronger, and lets you see through the fork rails for better visibility and increased safety (load backrest optional).

CoverNGo™ Seat Cover

Operator comfort in any weather.

Our own Canadian design, and our customers love it! Your seat will always be dry and comfortable with this retractable seat cover.

HiConnect™

All the information you need.

Real-time data optimizes operator, equipment and fleet performance, and maintenance on every Moffett M8 NX2.
